a bassa emissione di formaldeide

Eco panel

E1 panels with low emissions
of formaldehyde

Furlan

Utilizza energia certificata
da fonti rinnovabili

We use certified
renewable energy

L'attenzione dell'azienda al rispetto della natura e della salute del consumatore finale è dimostrata dall'utilizzo esclusivo di "eco pannelli", realizzati con materiale legnoso di "riciclo" e a basso contenuto di formaldeide (Classe E1) come previsto dal Catas (Catas Quality Award).

The company's effort in respecting both nature and our consumers' health can be seen in the choice it has made to exclusively use "eco-panels". These are made with wooden materials that can be recycled and that contain low levels of formaldehyde (E1 Class) in line with Catas regulations. The company also uses only water based paint.
